DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-31, drawn to a windup window shade, classified in class 160, subclass 238.
 - II. Claims 32-65, drawn to a motor vehicle door, classified in class 296, subclass 143.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed does not recite each and every feature of the subcombination, specifically the connecting means.

The subcombination has separate utility such as a windup window shade, in its own right, for a window not related to a motor vehicle, such as for the window of a house or office building, or for shading other items, such as a fish tank or green house.

Art Unit: 3612

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Claims 1-65 appear generic to a plurality of disclosed patentably distinct species comprising:

Four species for mounting the windup window shade:

Species A which is directed towards Figure 5;

Species B which is directed towards Figure 6;

Species C which is directed towards Figure 7; and

Species D which is directed towards Figure 8.

Five species for connecting the guide rail with the body of the vehicle:

Species E which is directed towards Figure 9;

Species F which is directed towards Figure 10;

Species G which is directed towards Figure 11;

Species H which is directed towards Figure 12;

Species I which is directed towards Figure 13; and

Species J which is directed towards Figure 14.

Art Unit: 3612

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for mounting the windup window shade and a single disclosed species for connecting the guide rail and body of the vehicle, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. A telephone call was made to Mr. Gabor Kelemen on Tuesday, September 17, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hilary L. Gutman whose telephone number is (703) 305-0496
